Re: Intercounty Engineering, Inc.

To Whom It May Concern:

Intercounty Engineering, Inc. was awarded a project by the City of Pompano Beach in February 2002 known as the North Course Drive Water Main project. This project consisted of 400 LF of 20" DIP Water Main, 700 LF of 20" Directional Bore, 139 LF of 20" steel Aerial crossing and two tie-ins. The City of Pompano Beach Engineering Dept. was very happy with the quality of workmanship and extremely pleased with the three month early completion time. The City of Pompano is happy to recommend Intercounty Engineering for underground utility construction and looks forward to working with the firm in the future.

Sincerely,

Clayton O. Young  
Civil Engineer  
City of Pompano Beach
